

Sanraksha App - Safety Features Overview

Sanraksha is an AI-powered safety application designed to keep users informed and protected. The app provides real-time updates, safety rankings, and assistance through a 24/7 chatbot named Kavach. Below are the key features of Sanraksha:

- **AI Safety Ranking** Sanraksha displays safety scores for various areas using verified crime data. The app employs color-coded zones to help users visually assess the safety of a particular region. - Red Zone: Most unsafe areas - Yellow Zone: Moderately safe areas - Green Zone: Safe areas

- **Recent Crime Updates** Stay informed with real-time updates about recent incidents in your area, sourced from trusted authorities. This feature ensures that users are aware of safety concerns around them.

- **Nearby Safe Zones** Highlight verified nearby safe spaces such as police stations and hospitals, ensuring that users can easily locate assistance in emergencies.

- **Community Feedback** Users can provide feedback and insights about different areas, sharing experiences and helping others make informed decisions about their safety.

- **Kavach Safety Chatbot** Kavach is a 24/7 AI-powered safety assistant that answers safety-related queries. It provides accurate and real-time responses based on reliable sources, ensuring that users receive timely information.
